

**MID-CAROLINA ELECTRIC COOPERATIVE, INC.
LEXINGTON, SC**

RIDER LOAD CONTROL RATE

AVAILABILITY

The availability of this Rider is limited to Rate Schedules D, G, and R, and by the number of switches allotted by the Cooperative's wholesale power supplier. This rate is not available to seasonal loads, aluminum sided mobile homes, and water heaters not wired to the National Electrical Code.

APPLICABILITY

To those members who have a Cooperative load control switch attached to their water heater(s) of at least 40 gallons (240 volts) and/or central air conditioner system(s), and whose electrical consumption is 500 kilowatt-hours per month or greater.

TYPE OF SERVICE

The Cooperative shall have the right to interrupt service to the member's central air conditioning (cooling) system(s) and/or electric water heater(s). This interruption of service may be at any time for the purpose of curtailing system demand. The Cooperative also reserves the right to "control test" the functioning of these control devices, at any time, and to physically inspect the switch(es) at any reasonable time.

CREDITS FOR LOAD CONTROL

A \$2.00 monthly payment, in the form of a billing credit, will be made to the member for each water heater control switch that is installed during each entire billing period.

A \$4.00 monthly payment, in the form of a billing credit, will be made to the member for each central air conditioner control switch that is installed during each entire billing period of June, July and August.

EFFECTIVE DATE

This rate becomes effective for those accounts that qualify and are billed on, or after, November 1, 2010, and is subject to being modified or discontinued by the Cooperative, at its sole discretion, based upon the benefits of load control.
